

Zoom Transcript Downloader User Guide

Version 2026.08

The main workflow

Open your Zoom **Transcripts** page, wait for the panel to appear, click **Save all**, and keep the tab open until the run finishes.

1. INSTALL

Choose The Installation Method

Recommended: Chrome Web Store

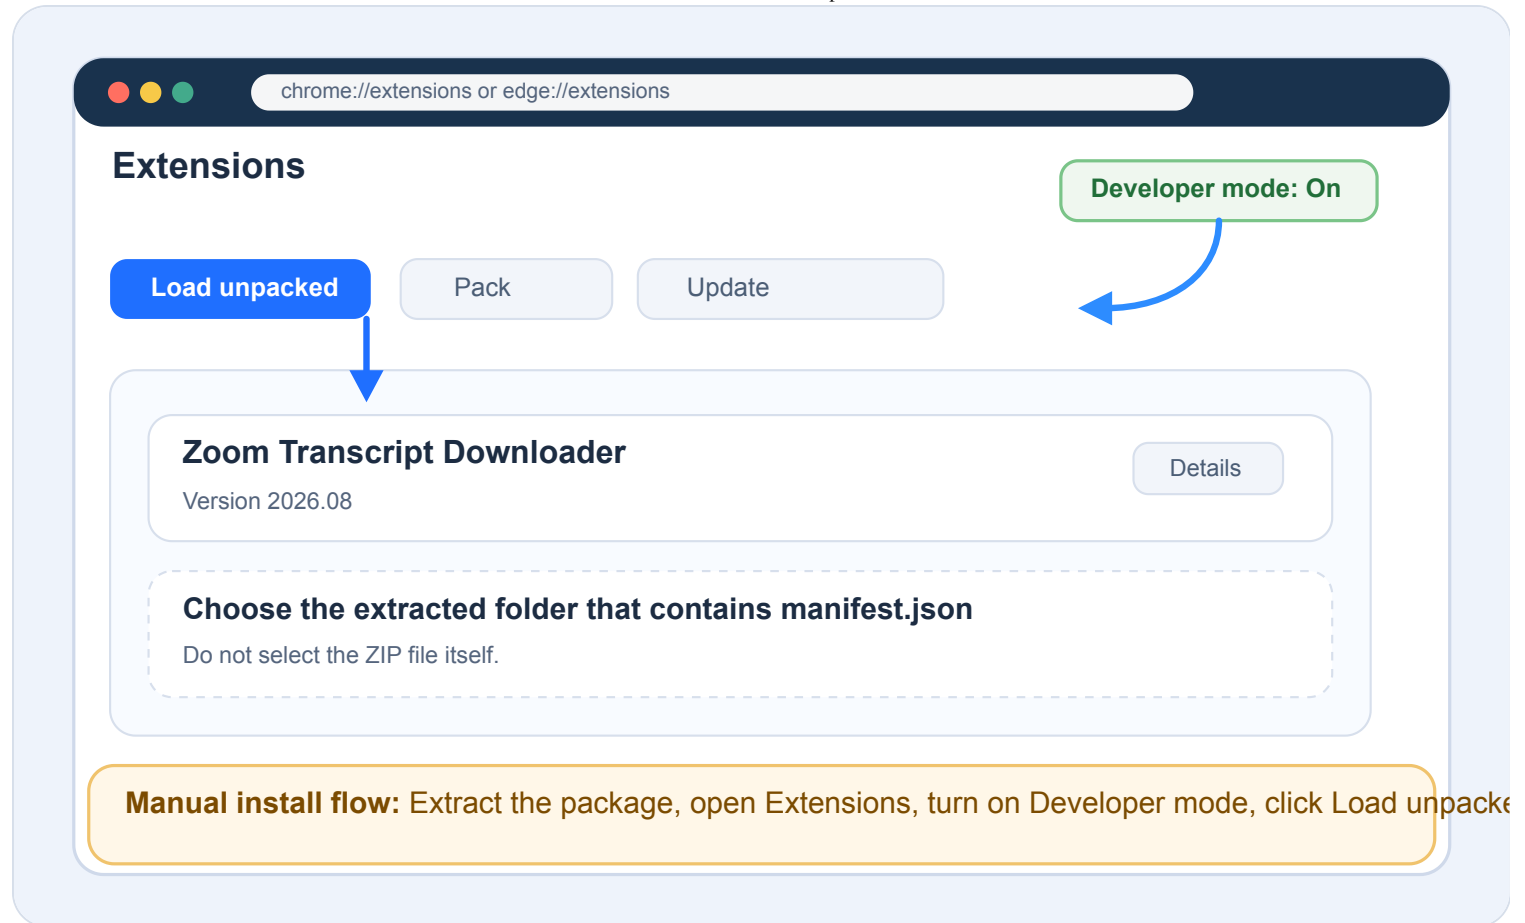

1. Open the direct listing link.
2. Select **Add to Chrome**.
3. Approve the install prompt.
4. Confirm the extension appears in the browser Extensions menu.

<https://chrome.google.com/webstore/detail/lbmejnmnbjnoahehjfmbhaiheopkgcdg>

This listing is private or unlisted, so users normally open it from the direct link.

Alternative: Manual Install

1. Download the package and extract it if it is a ZIP file.
2. Open
`chrome://extensions`
or
`edge://extensions` .
3. Turn on **Developer mode**.
4. Select **Load unpacked**.
5. Choose the extracted folder that contains `manifest.json` .

Manual installation overview for Chrome or Edge.

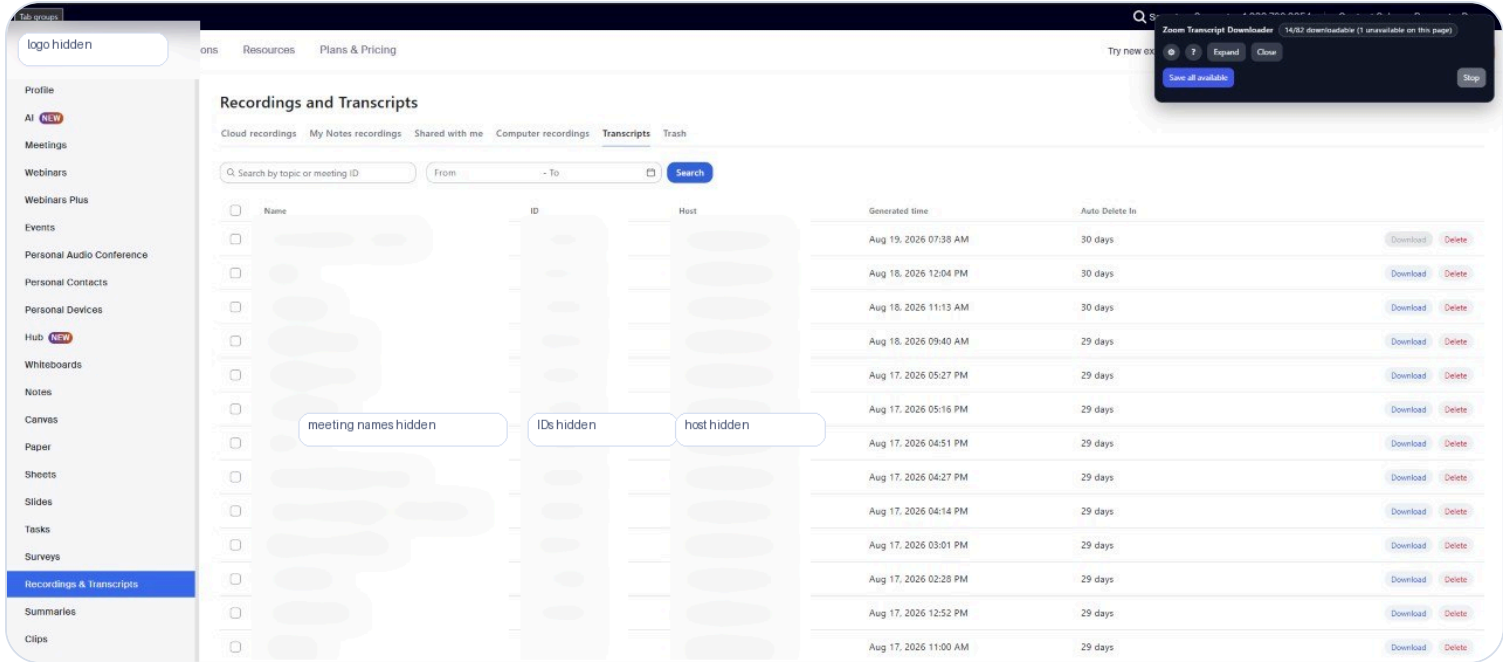

Microsoft Edge: if you install from the Chrome Web Store in Edge, allow extensions from other stores if Edge prompts you.

2. OPEN ZOOM

Go To The Correct Zoom Page

1. Sign in to your Zoom web portal.
2. Open the area that contains recording transcripts.
3. Select the **Transcripts** tab or view.
4. Confirm transcript rows are visible.

Example URL format: `https://your-company.zoom.us/recording/meeting/transcript`

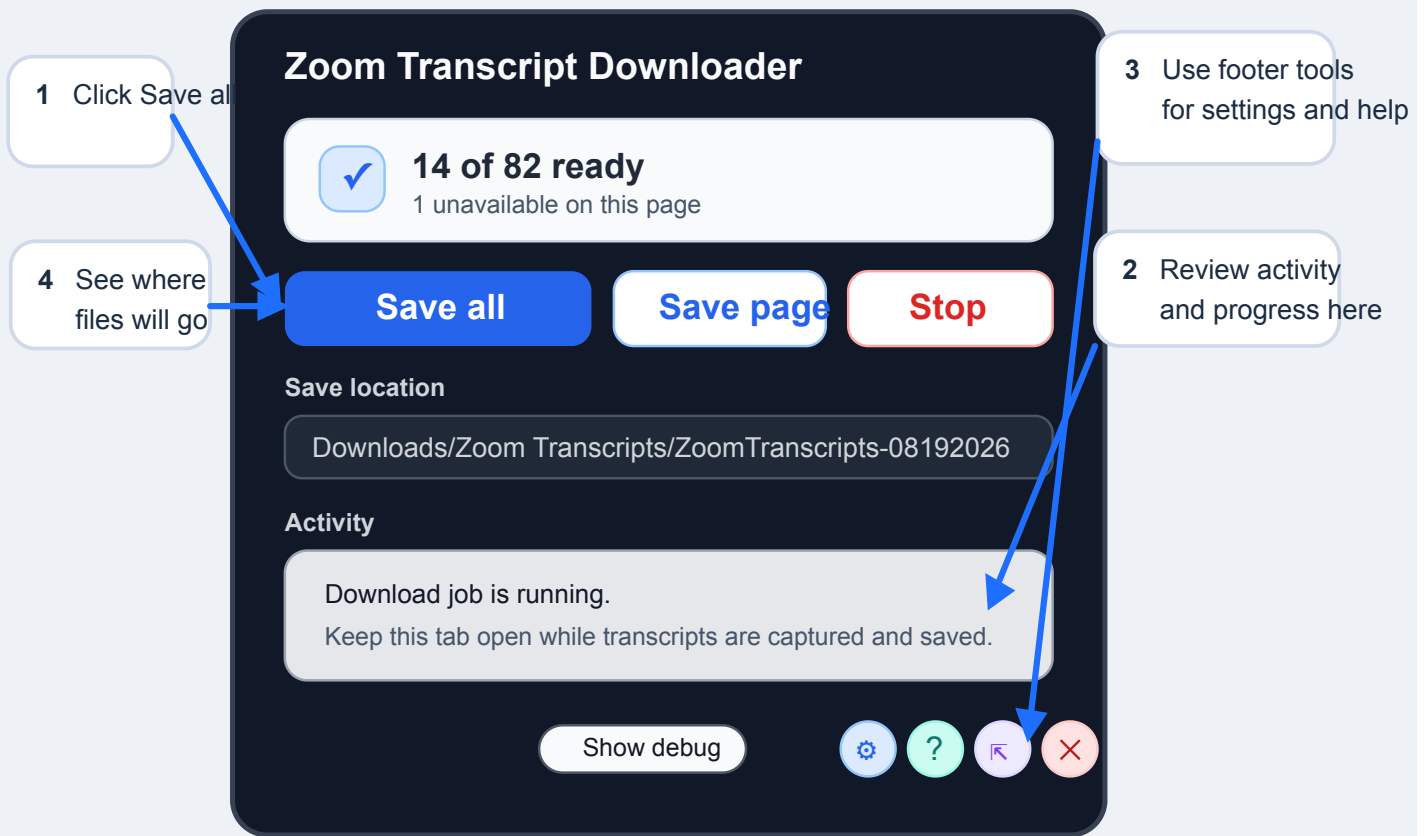

Example Zoom Transcripts page. Your Zoom hostname and layout may vary.

Expected behavior: the panel should appear automatically when you open a supported Zoom Transcripts page. If you closed it earlier, reopen it from the browser Extensions menu.

3. DOWNLOAD

Save All Available Transcripts

1. Open the Zoom **Transcripts** page.
2. Confirm the Zoom Transcript Downloader panel is visible.
3. Click **Save all**.
4. Use **Save page** if you only want the transcripts visible on the current page.
5. Keep the Zoom tab open while the extension works.
6. Wait for the completion message.

The main panel keeps the primary workflow short and visible.

What happens automatically

- The extension returns to page 1 before starting.
- It reviews the transcript pages to plan final filenames.
- It saves the transcript text files Zoom currently allows.
- It skips transcript rows that Zoom marks as unavailable.
- It reports the result when finished.

4. FIND FILES

Where Your Files Go

Files save inside your browser's normal **Downloads** location. You can choose a folder underneath Downloads, such as **Zoom Transcripts** or **Work/Zoom**.

Recommended: use a dedicated transcript folder for organization. This is optional and not required for the extension to work.

5. CUSTOMIZE

Customize File Names And Download Location

The screenshot shows the 'Settings' dialog for the Zoom Transcript Downloader. It contains the following elements:

- Filename pattern:** A text input field containing the placeholder `{date} - {time} - {title}`. A callout '1 Use placeholders' points to this field.
- Preview:** A text input field showing the result of the pattern: `2026-08-14 - 1601 - Team Weekly Sync.txt`. A callout '2 Check the live preview' points to this field.
- Save folder inside Downloads:** A text input field containing 'Zoom Transcripts'. A callout '3 Choose a Downloads subfolder' points to this field.
- Destination preview:** A text input field showing the full path: `Downloads/Zoom Transcripts/ZoomTranscripts-08192026`.
- Include meeting ID in every filename:** A checkbox that is checked. A callout '4 Meeting ID is optional' points to this checkbox.
- Save settings:** A blue button at the bottom right.

Use Settings to control filenames and the Downloads subfolder.

Default filename

`{date} - {time} - {title}`

Example result: `2026-08-14 - 1601 - Team Weekly Sync.txt`

Meeting ID

Meeting ID is optional by default. The extension adds it automatically if two transcripts would otherwise receive the same filename.

Placeholder	Meaning	Example
{date}	Meeting date	2026-08-14
{time}	Meeting time	1601
{title}	Zoom meeting title	Team Weekly Sync
{meetingId}	Zoom meeting ID	12345678901

Use the previews

The Settings dialog shows both a filename preview and a destination preview. Check them before you save your settings.

6. TROUBLESHOOTING

Common Problems

Panel does not appear

- Confirm you are on the Zoom **Transcripts** page.
- Refresh the page.
- Make sure the extension is installed and enabled.
- Reopen it from the browser Extensions menu.

No transcripts are found

- Make sure transcript rows are visible in Zoom.
- Confirm you are on **Transcripts**, not another recordings view.
- Refresh the page and wait for the list to finish loading.

Browser prompts for every file

- Open the browser download settings.
- Turn off the setting that asks where to save each file before downloading.
- Run the batch again.

Page changed during the run

- Refresh the Zoom page.
- Wait for the transcript list to finish loading.
- Start **Save all** again.

Advanced troubleshooting

Use **Show debug** only when you are reporting a problem. The debug view may include meeting titles, meeting IDs, page information, and Zoom page URLs.

7. UPDATES

Keep The Extension Current

Chrome Web Store install

Browser-installed extensions normally update automatically.

Manual install

1. Update the local extension files.
2. Open `chrome://extensions` or `edge://extensions`.
3. Select **Reload** for Zoom Transcript Downloader.
4. Refresh the Zoom page.
